

## **Photographic Security System Invented for Motor Vehicles - Designed by InventHelp Client (DLL-3095)**

*A leading invention company, InventHelp is submitting the CAR SELFIE to applicable companies for their consideration.*

Pittsburgh, PA ([PRWEB](#)) December 19, 2016 -- With car thefts on the rise, car manufacturers continue to prioritize security in car locking systems. Criminals, however, continue to engineer break-ins. Thanks to the ingenuity of an inventor from Arlington, Texas, however, these thieves can now be caught in the act.

He developed a prototype for CAR SELFIE to prevent car break-ins and thefts by sending photographic evidence of such tampering, illegal towing and other illegal activities to car owner. As such, it has the potential to save lives and prevent injuries and to assist with prosecution of perpetrators. It also alerts the driver if a child or pet has been left behind unattended in a parked car. In addition, it affords peace of mind for concerned drivers and is convenient, effective and affordably priced.

The inventor's personal experience inspired the idea. "After being a victim of car theft and illegal towing myself and hearing about similar crimes on the news," he said, "I decided to pursue an idea that would protect car owners against such occurrences."

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-DLL-3095, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
