

## **InventHelp Invention Protects Vehicles' Center Consoles from Damage (FED-1678)**

*A leading invention company, InventHelp is submitting the PROTECTIVE COVER to companies for their consideration.*

P ([PRWEB](#)) December 19, 2016 -- An inventor from Auburn, Wash., owns an expensive car, and his seat-belt buckle scratched the center console pretty badly, so he looked for a reliable way to prevent this both unsightly and expensive problem. "I finally came up with the idea for the patent-pending PROTECTIVE COVER and decided to develop it," he said.

This invention prevents a seat-belt buckle from scuffing and scratching the center console of a vehicle interior. As a result, it avoids unsightliness and the need for expensive repairs. It also allows for better resale value.

Featuring an easy-to-install design and producible in design variations, the PROTECTIVE COVER promotes an attractive appearance and peace of mind for all vehicle owners.

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-FED-1678, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
