

Modified Ladder Rack is More Versatile and Convenient for Pickup-Truck Owners - Designed by InventHelp Client (LAX-787)

The WILL RACK is being submitted to interested companies by InventHelp, a leading invention submission firm.

PITTSBURGH, PA ([PRWEB](#)) December 21, 2016 -- As a construction superintendent, an inventor from Oxnard, Calif., needs to have a ladder with him at all sites, and he often needs to extend the load capacity of his truck's bed. However, having both a rack and bed extender in a truck requires a lot of space and can be an eyesore. In order to solve these problems he conceived of the patent-pending WILL RACK.

This modified ladder rack allows for more versatile use in a pickup truck. It also facilitates transportation of large loads. Most important, it doesn't take up a lot of space during non-use, and it prevents eyesores.

The WILL RACK is ergonomic, durable and easy to use, and it's ideal for pickup-truck owners and contractors.

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
