

## **Accessory for Children's Car Seats Invented by InventHelp Client (OCM-765)**

*InventHelp is attempting to submit this idea, the COZY CAR SLEEPER, to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 23, 2016 -- "I noticed that my son's head would toss back and forth with the movement of the car or would slump forward onto his chest," an inventor from Riverside, Calif., explained. "I wanted something that would help make car rides more comfortable for children in car seats."

She designed the COZY CAR SLEEPER as an after-market accessory for children's car seats. The accessory would be easy to install and would provide secure comfort and stability to children when they fall asleep on car rides.

The inventor explained, "Not only would this accessory help a child feel more comfortable during naps in the car, I hope it will prevent sore, stiff necks caused by a child's head moving around with the motion of the car."

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCM-765, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
