

VAMR Helps Keep Vehicle Maintenance Updated - Designed by InventHelp Client (SDB-994)

InventHelp is working to submit this idea, the VAMR, to appropriate companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 26, 2016 -- An inventor from San Diego, Calif., has designed an alternative way to keep vehicle-maintenance needs updated so that the vehicle is working properly and safely. "I thought of this because it's crucial to stay on top of maintenance for a vehicle in order to avoid eventual expensive, irreparable and dangerous problems," he said. Warning lights don't cover every major aspect of a vehicle's needs, and windshield stickers fade after a while, which results in missed alerts. Now there's a way to keep vehicle owners updated on what needs to be repaired or replaced so as to streamline and assure proper vehicle care.

VAMR (pronounced "vamer") helps a vehicle owner stay updated on what needs to be repaired and replaced on a vehicle. This streamlines and guarantees proper maintenance, as well as prevents the development of worse problems that can be irreparable and dangerous. Overall, it promotes convenience, safety and peace of mind.

Compact, versatile and easy to use, VAMR is compatible with all vehicles and is suitable for all vehicle owners, dealer service stations, fleet vehicles and vehicle manufacturers.

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SDB-994, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
