

InventHelp Invention Allows For Mess-Free Vehicle-Tire Coating/Cleaning (AVZ-1470)

InventHelp, one of America's largest invention companies, is submitting the PRO SHIELD to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 28, 2016 -- People who take pride in their vehicles like the wheel rims to look nice, but the very thing that enhances the look of tires can end up marring rims. Special sprays are used to makes tires look shiny and new, but the spray tends to get on the rims as well. "In order to solve this problem I conceived of the PRO SHIELD," said an inventor from Shreveport, La.

He then created a prototype of the PRO SHIELD, a device that allows vehicle tires to be treated with coating or cleaning chemicals in a more convenient manner. It prevents wheel rims from becoming marred, as well as ensures that rims remain spotless and shiny after the process. Overall, it enhances the look of a vehicle.

Ergonomic, lightweight, easy to use and producible in design variations, the PRO SHIELD is ideal for professional car detailers and DIY car enthusiasts.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AVZ-1470, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
