

## **InventHelp Invention Protects Drivers' Arms from Hot Sunlight (CBA-3073)**

*A leading invention company, InventHelp is working to submit the ARM GUARD to interested companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 29, 2016 -- Two inventors from Conway, S.C., want to make driving on a sunny day a pleasant experience instead of a painful one. "We've experienced discomfort while driving in sunny weather because the left arm is often exposed to hot sunlight for long periods," said one inventor. "In order to solve this common problem, we conceived of the ARM GUARD."

This invention keeps the left arm comfortable while driving in sunny weather by providing shelter from the hot sun. As a result, it avoids discomfort and sunburn, which promotes relaxation and peace of mind. Portable and easy to use, the ARM GUARD can be produced in design variations, and it's ideal for all drivers.

The inventors have created a prototype of their idea.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CBA-3073, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
