

InventHelp Inventor Develops Storage Solution for Tie-Down Straps (CCP-1170)

InventHelp, founded in 1984 in Pittsburgh, is submitting the STRAP HOLDER to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 29, 2016 -- "I was tired of my employees tripping over or loosing the eight to 10 unraveled straps on the truck or trailer floor," said an inventor from Schaumburg, Ill. "As a convenient storage solution, I came up with this band system to allow straps to be rolled up and hung up safely out of the way."

He created a prototype for the STRAP HOLDER to allow any and all straps to be rolled up and banded easily for safe storage right at the entry to the trailer. The unit keeps straps from coming unraveled when not in use. The device prevents loose straps from creating trip-and-fall hazards on the ground. It ensures that the work area remains neat, tidy and free of clutter caused by straps, and all straps can be numbered to ensure accountability of loose straps. Furthermore, the invention can be retrofit to existing straps.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCP-1170, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
