

## **External Car Heater for Ice Prevention Invented by InventHelp Client (CIC-195)**

*A leading invention submission firm, InventHelp is submitting THE SNOWMASTER to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 29, 2016 -- Driver safety is greatly hindered by winter weather conditions, such as snow and ice. Not only do snow and ice make roads slicker, but can accumulate on and around a vehicle, interfering with the breaking and steering of the vehicle.

An inventor from South Bend, Ind., has had first hand experience with harsh winter weather conditions, and invented the patent-pending THE SNOWMASTER as a means to combat snow and ice. "Living in the Midwest, I experience a lot of snow and ice," said the inventor. "I was inspired to invent a device that would improve driver safety and reduce the amount of snow accumulation around a parked car." THE SNOWMASTER improves a driver's control over the vehicle, reduces the chance of damaging the vehicle while scraping ice off the tires and provides peace of mind to safety-conscious motorists.

This invention would appeal to any car owner, as well as businesses that operate vehicles. It gives drivers a hands-off approach to clearing snow and ice away from their vehicle.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-195, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
