

Audiovisual Recorder for Vehicles Invented by InventHelp Client (CIC-422)

JAKIM'S EYE is being submitted to interested companies by InventHelp, a leading invention submission company.

PITTSBURGH, PA ([PRWEB](#)) December 29, 2016 -- Unfortunately, news stories about altercations between police officers and civilians have been prevalent over the last several years. These stories often lead to conversations about race, gender and human rights.

Because some of these altercations arise between an officer and a motorist at a traffic stop, an inventor from Park Forest, Ill., decided to invent the patent-pending JAKIM'S EYE. This invention is an audiovisual recorder that can be used by a motorist after being pulled over. "I was inspired to invent this device because of my own personal concerns and because of the news stories about traffic stops gone wrong between a police officer and a motorist," said the inventor.

JAKIM'S EYE allows motorists to produce substantial evidence while in court. Additionally, it helps to weed out abusive police officers, as well as encourages them to behave professionally and in a courteous manner towards the motorist in question.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-422, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
