

## **InventHelp Inventor Designs a Safer and More Secure Way for Dogs to Ride in Vehicles (ORD-2301)**

*A Pennsylvania-based invention company, InventHelp is submitting the DOGGIE BELT to companies for their possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) January 09, 2017 -- When children ride in vehicles they are restrained properly, but dogs are left loose, which can result in their injury. This inspired an inventor from Palm Bay, Fla., to design a convenient and effective way to secure dogs in vehicles.

The DOGGIE BELT provides security and safety for a dog riding in a vehicle. It prevents the dog from falling forward if the vehicle stops abruptly, which helps avoid injury. Overall, it promotes peace of mind. Ergonomic, easy to use and producible in design variations, the DOGGIE BELT also can be used for other pets.

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ORD-2301, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
