

## **CABRELLA Invented by InventHelp Client (SDB-1001)**

*InventHelp, founded in 1984, is submitting this idea, the CABRELLA, to appropriate companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) January 11, 2017 -- An inventor, from Chula Vista, Calif., thought there needed to be a way to block sunlight and keep the interior of a parked car cool, so he invented the CABRELLA.

The CABRELLA provides an effective way to protect a parked vehicle from the sun. In doing so, it prevents a vehicle's interior from overheating. As a result, it enhances comfort and it could help to prevent UV damage and fading. The invention features a user-friendly design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the CABRELLA is producible in design variations.

The inventor described the invention design. "My design ensures that a parked car remains cool and comfortable."

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SDB-1001, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
