

InventHelp Inventor Develops Truck-Bed Organization System (SAH-903)

InventHelp, a leading invention company, is submitting THE TRUCK BED CADDY to companies for their review and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) November 11, 2015 -- "As a painter and drywall contractor, I drive around with several buckets and lots of other supplies in my truck bed," said an inventor from West Sacramento, Calif. "In order to keep them from sliding around in the bed while I drove from job to job, I devised this organizational system."

He created a prototype for the patent-pending THE TRUCK BED CADDY to store and organize supplies in the truck bed. The unit securely restrains and stabilizes bags, buckets, tools, supplies, etc. This prevents the bed's contents from shifting during stopping, turning and accelerating, which ensures that there are no spills or messes. Furthermore, the device is adaptable for use with any pickup truck.

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SAH-903, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
