

InventHelp Inventor Develops Vehicle Air-Freshener System (SUU-139)

Based in Pittsburgh, Pa., InventHelp is submitting the INCENSE to appropriate companies for their review and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) November 11, 2015 -- "I wanted to keep the interior of my car smelling fresh and clean, but I did not like the scent of the tacky air fresheners sold at gas stations," said an inventor from St. Louis, Mo. "This inspired me to develop a better air-freshening system for automobiles."

He developed the INCENSE to offer an efficient way to freshen the air inside a motor vehicle. The design enables the driver to control the amount of scent released so that it will not be overpowering. The system eliminates the need for unsightly hanging air fresheners. It features an unobtrusive design that maintains the vehicle's stylish appearance. Furthermore, the invention is adaptable for use with new and existing vehicles.

The original design was submitted to the St. Louis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SUU-139, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
