

## **InventHelp Inventor Designs Improved Muffler Accessory (TPA-2118)**

*Pittsburgh-based InventHelp is working to submit V FREE FLOW SYSTEM to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 11, 2015 -- An inventor, from North Port, Fla., thought there could be a more effective way to increase power, performance and sound in high performance vehicles, so he invented the V FREE FLOW SYSTEM.

The V FREE FLOW SYSTEM helps to reduce exhaust restrictions and back pressure on a vehicle engine. In doing so, it offers an alternative to standard mufflers and it improves power, performance and sound. As a result, it could also help to improve the overall fuel economy of the vehicle. The invention features an adjustable design that can be adapted for use on different high performance vehicles so it is ideal for automotive enthusiasts. Additionally, the V FREE FLOW SYSTEM is producible in design variations.

The inventor described his inspiration for the invention. "I thought it would be cool if there was a way to reduce restrictions and improve the exhaust flow in high performance vehicles, so I invented this."

The original design was submitted to the Tampa office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-TPA-2118, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
