

Avoid Dangerous Cell-Phone Distractions While Driving - Designed by InventHelp Client (FED-1704)

A leading invention firm, InventHelp is submitting this idea, the DRIVE SAFE, to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) March 31, 2017 -- "Despite so many ads warning against texting while driving I see a lot of drivers doing just that, or otherwise engaged with this phone," said an inventor from Seattle, Wash. Since she wants to eliminate this danger, she's come up with a way to avoid cell-phone distractions during driving.

The patent-pending DRIVE SAFE allows for safer driving when a cell phone is in a vehicle. It prevents distractions caused by texting or checking social media while driving. This enables the user to keep his or her eyes on the road at all times, which helps prevent damaging, injurious or fatal accidents.

Compact, easy to use and compatible with all vehicles, DRIVE SAFE is designed to promote responsibility and peace of mind.

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FED-1704, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
