

InventHelp Client Designs KEEP COOL - Ensures Convenient Personal Cooling (MTN-2740)

A leading invention submission company, InventHelp is submitting the KEEP COOL to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) April 10, 2017 -- Sitting on a hot seat while riding in a vehicle can be very uncomfortable and cause excessive sweating on the back and buttocks, so an inventor from Brooklyn, N.Y., decided that there should be a way to solve this common problem. That's when he came up with the patent-pending KEEP COOL.

This device ensures that a person is cool while sitting in a vehicle seat, baby car seat, stroller, etc., during hot weather. It avoids discomfort and promotes relaxation, better health and peace of mind instead.

Versatile and easy to use, the KEEP COOL is ideal for the general population. Its variations include different sizes, colors, styles and versions (such as one for a backpack, and one for vests and jackets).

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-MTN-2740, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
