

Inventor and InventHelp Client Develops Universal Spare Tire (NJD-1080)

One of America's leading inventor service firms, InventHelp is submitting the EZ UNIVERSAL FIT to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) April 10, 2017 -- "I have experienced flats before, and unless you have a perfect spare in the trunk, then you are stuck waiting for emergency roadside assistance to come to your rescue," said an inventor from Bayonne, N.J. "I came up with this idea to get motorists going again fast."

He developed the EZ UNIVERSAL FIT to serve as a temporary replacement wheel when a flat tire is experienced. The invention features a universal fit that mounts quickly and easily. This ends potential problems caused by differing hub bolt patterns and configurations. The device enables the motorist to get back on the road quickly. It helps avoid the need for expensive roadside repairs. Furthermore, the wheel is adaptable for use with virtually any car or light-duty truck.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1080, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
