

Clear Snow and Ice from Commercial Trucks and Other Large Vehicles Easily with the JB MOBILE SYSTEM - Designed by InventHelp Client (TOR-9682)

One of America's leading invention submission companies, InventHelp is submitting the JB MOBILE SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 14, 2017 -- Heavy accumulations of snow and ice on commercial trucks, tractor trailers, buses and other large vehicles causes problems such as obstructed visibility for following drivers due to blown-off snow and ice, additional weight on the vehicle, and legal consequences and fines by law enforcement. "As a truck driver, I decided that there should be a simple and effective way to avoid these problems," said an inventor from Lanark, Ontario, Canada, "so I came up with the JB MOBILE SYSTEM."

The JB MOBILE SYSTEM allows for quick, easy dislodging and removal of snow and ice from the tops of large commercial trucks, tractor trailers, buses or other large vehicles. It prevents snow and ice from blowing into the path of other drivers and ruining their visibility. This helps prevent damaging and injurious accidents.

The JB MOBILE SYSTEM also eliminates the need for manual sweeping or chipping, avoids excessive extra weight on the vehicle, and promotes compliance with road rules in order to avoid legal consequences and fines.

The inventor has created a prototype of his idea.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TOR-9682, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
