

InventHelp Inventor Develops Vehicle Coin Organizer/Dispenser (BMA-4822)

Based in Pittsburgh, Pa., InventHelp is submitting the CAR CHANGER to companies for their potential consideration.

PITTSBURGH, PA ([PRWEB](#)) May 20, 2017 -- An inventor from Worcester, Mass., has developed the patented CAR CHANGER, an electronic coin organizer and dispenser for the interior of a motor vehicle. This device enables a driver to create the precise amount of change required for a drive-through window or tolls at bridges and highways.

"I often use drive-through service, and I'm left scrambling to find the appropriate change for my order," said the inventor. The CAR CHANGER keeps coins organized and easy to access. This eliminates frantic searches for coins while in a vehicle. It will provide the correct amount of change when needed. It is also designed so that the driver can remain focused on the road, especially when approaching a toll booth.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BMA-4822, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
