

Remove Snow and Ice from Vehicles and Other Surfaces With the SNOW WAND - Designed by InventHelp Client (BMA-4836)

A leading invention firm, InventHelp is submitting the SNOW WAND to applicable companies for their consideration and possible feedback.

PITTSBURGH, PA ([PRWEB](#)) May 20, 2017 -- After a huge snowstorm left my community under 12 inches of snow, an inventor from Roxbury, Mass., considered the hard work it took for everyone to clear away the snow and decided that there should be a better way to do this.

The patent-pending SNOW WAND enables a user to clear away snow and ice from a vehicle exterior or other surface in a quicker, easier manner. This avoids strain and hassle, as well as saves time and effort.

Ergonomic, compact, versatile, easy to use and producible in different sizes, colors and designs, the SNOW WAND promotes convenience, efficiency and peace of mind.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BMA-4836, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
