

## **Inventor and InventHelp Client Develops Steering-Wheel Accessory for Cold Weather (CPC-216)**

*Based in Pittsburgh, Pa., InventHelp is submitting the HEATED STEERING WHEEL COVER to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) May 25, 2017 -- "Due to extremely cold weather, I had to operate my vehicle with gloves on," said an inventor from Meriden, Conn. "I thought that there had to be a way to keep the steering wheel warm so that it would not freeze my fingers and force me to wear gloves."

He developed the HEATED STEERING WHEEL COVER to offer a convenient way to warm the steering wheel. The accessory eliminates the need to wear gloves while driving, as it keeps the fingers toasty and warm. This prevents the driver from being distracted by cold hands. The device makes driving in cold-weather conditions more comfortable. Additionally, it is adaptable for use in any vehicle.

The original design was submitted to the Connecticut office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CPC-216, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
