All Traffic Solutions Releases Traffic Calming Methods Whitepaper

Paper Shares Benefits of Web-Enabled Radar Speed Displays to Make Roads Safer

Herndon, VA (PRWEB) March 30, 2017 -- All Traffic Solutions, the leader in cloud-based traffic management solutions for law enforcement, transportation and smart cities, has released a white paper, Five Ways to Calm Traffic—Which is Right for You? which looks at the five most widely-used methods of speed control, and how incorporating a data-centric traffic calming solution delivers the most effective and efficient traffic program management.

This white paper also explores why web-enabled radar speed displays are a cost effective and expedient solution to traffic calming, and how law enforcement, municipalities and traffic engineers can utilize real-time traffic data and analytics to:

• Track traffic volume and speeds, identify areas most in need of remediation, and deploy solutions immediately
• Identify enforcement priorities
• Receive real-time alerts for high-speed violators, as well as sign tampering and battery status
• Document DOT study requests and assist with traffic studies
• Leverage data reports and analytics in near-real time for rapid decision making

Download the white paper here.
