

InventHelp Inventor Develops Alternative Automotive Sun Visor (TPA-2144)

A leading invention submission firm, InventHelp is submitting the PORTABLE VISOR to companies for their review.

PITTSBURGH, PA (PRWEB) November 03, 2015 -- "I hate when sunlight comes in from the side window while I am driving, as I do not have a way to block it out effectively," said an inventor from St. Petersburg. Fla. "Thinking that there had to be a better way to do away with this distracting glare, I developed this idea."

He developed the PORTABLE VISOR to effectively block sunlight coming in the driver's side window. This prevents sunlight and glare from distracting the driver. The unit ensures that the driver has an unobstructed view of the roadway. The invention is designed to enhance automotive safety by helping to reduce the risk of accidents. Additionally, it is adaptable for use with any automobile.

The original design was submitted to the Tampa office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-TPA-2144, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
