

## **InventHelp Inventors Design Alternative Motor System (ATH-298)**

*InventHelp, a Pittsburgh-based invention submission company, is submitting the 4 MOTORS to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 04, 2015 -- If the engine of a vehicle fails that vehicle isn't going to move on its own, no matter what. This problem inspired two inventors from Tybee Island, Ga., to rethink the design of vehicle engines.

4 MOTORS optimizes vehicle reliability and minimizes repair costs. It also helps prevent a driver from being stranded. This dependable system is suitable for all drivers, especially truckers, the military and recreational-vehicle owners. The idea is patent pending.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-ATH-298, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
