

InventHelp Invention Avoids Lost Cab Fares Due to Neglected Dome Lights (AVZ-1295)

InventHelp, based in Pittsburgh, is submitting this idea, the DOME LIGHTMETER RELAY SWITCH, to companies for review.

PITTSBURGH, PA ([PRWEB](#)) November 04, 2015 -- "I'm a cab driver, and I always have the problem of forgetting to turn the cab's dome light back on after I've completed a fare," said an inventor from Honolulu, Hawaii. "This causes me to lose potential customers because they think my cab is occupied as I pass by." The inventor's design solves this common problem.

Easy to use and compatible with all cabs, the DOME LIGHTMETER RELAY SWITCH prevents a cab driver from forgetting to turn on the cab's dome light after completing a fare. This avoids the loss of potential customers, which promotes productivity and peace of mind.

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-AVZ-1295, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
