

## **Inventor and InventHelp Client Develops Automotive Accessory (CTO-741)**

*InventHelp, a leading invention submission company, is submitting the STEP UP to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 06, 2015 -- "Individuals with limited mobility have a difficult time getting into and out of vehicles," said an inventor from Bridgeport, Conn. "To make it easier for people to simply enter and exit their vehicles, I developed this accessory."

He developed the STEP UP to enable an individual to enter and exit a vehicle easily. It reduces the physical stress and strain involved with getting into and out of a vehicle. The invention is designed to enhance personal safety by reducing the risk of slips, trips and falls, which provides added peace of mind. Furthermore, the device is ideal for use by motorists with limited mobility, and it is adaptable for use with any vehicle.

The original design was submitted to the Connecticut office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CTO-741, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
