

## **More Comfortable Children's Car Seat Invented by InventHelp Client (HLW-1526)**

*InventHelp, based in Pittsburgh, Pa., is submitting the RBB SLEEP to companies in the hopes of a good faith review.*

PITTSBURGH, PA ([PRWEB](#)) November 07, 2015 -- After noticing that his children's heads tilted forward or to the side whenever they fell asleep in their car seats, an inventor from Miami Gardens, Fla., decided to create a solution to this problem.

The patent-pending RBB SLEEP makes it more comfortable for a child to rest or sleep while riding in a car seat. It prevents his or her head from tilting forward or to the side. As a result, it avoids neck pain and disturbed rest or sleep. This easy-to-use car seat is ideal for parents and guardians of children, hospitals, daycare centers and child-transportation services.

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-HLW-1526, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
