

Alternative Fuel Container Saves Space and Promotes Convenience - Designed by InventHelp Client (HLW-1533)

A Pittsburgh-based inventor service company, InventHelp is submitting the EXPANDABLE FUEL CONTAINER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 07, 2015 -- "I fill gas containers in order to work on my lawn, but I haven't the space for the number of containers needed," said an inventor from Cutler Bay Fla. "This inspired me to design a more convenient fuel container."

The patent-pending EXPANDABLE FUEL CONTAINER serves as a more convenient fuel container that's easier to store and transport. It doesn't take up a lot of space, so it avoids clutter in vehicles and garages. The container is easy to use and producible in design variations.

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-HLW-1533, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
