

InventHelp Inventor Designs COMBO TRAILER (ROH-120)

InventHelp, founded in Pittsburgh, Pa., is submitting the COMBO TRAILER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 10, 2015 -- An inventor, from Eden, N.Y., thought there needed to be a more convenient way to transport and store a pontoon and a personal watercraft, so he invented the patent-pending COMBO TRAILER.

The COMBO TRAILER offers an effective way to simultaneously transport a pontoon boat and personal watercraft (PWC). In doing so, it eliminates the need to drive multiple tow vehicles or to pull two trailers. It also provides a space-saving winter storage solution for pontoons and PWCs. The invention features a versatile design that is convenient and easy to use so it is ideal for the owners of pontoon boats and personal watercrafts. Additionally, the COMBO TRAILER saves time and space, it is producible in design variations and a prototype is available. If desired, it can carry a golf cart, scooter, etc., on the front.

The inventor described the invention design. “My design allows a pontoon and a PWC to be brought to the lake without using an extra tow vehicle or trailer.”

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-ROH-120, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
