

InventHelp Inventor Develops Vehicle-Detailing Accessory (SAH-898)

InventHelp, founded in 1984, is submitting the GLOSS & TOSS to applicable companies for their review and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) November 10, 2015 -- "I have been a car enthusiast my whole life, and I love taking good care of my vehicle," said an inventor from San Ramon, Calif. "One difficult task is to clean and shine the tires, as the tire-shine solution is messy. Not wanting to get it on my hands, I came up with this applicator."

He developed the disposable GLOSS & TOSS to offer a more efficient way to apply shine solution to tires. The accessory prevents accidental overspray and drips. It eliminates the need to go back and wipe overspray off the rims. This saves time and effort when detailing a vehicle. The design keeps tire-shine solution off the hands and skin. Additionally, it ensures that the tires look clean and new, and it can be used for other applications. The idea is patent pending.

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SAH-898, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
