

System Designed to Prevent Children from Being Forgotten in Vehicles - Designed by InventHelp Client (MIS-215)

A leading inventor service firm, InventHelp is submitting the BABY G.O. ALERT SYSTEM to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) June 03, 2017 -- Distracted parents or guardians of children sometimes get distracted and forget that their children are still in vehicles. This can result in tragedy that haunts parents and guardians for the rest of their lives. "Concerned about the number of children who've died from this error, I decided to invent something that helps solve the problem," said an inventor from Rushford, Minn.

The BABY G.O. ALERT SYSTEM prevents a parent or guardian of a child from leaving him or her behind in an unattended vehicle. This avoids having the child exposed to injurious or fatal heat or cold, which optimizes safety.

Reliable, easy to use and ideal for anyone caring for children, this system promotes peace of mind and spares the parents or guardians a lifetime of regret.

The original design was submitted to the Mississippi office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-MIS-215, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
