

InventHelp Inventor Develops Alternative Security System for Vehicles (MTN-2709)

Pittsburgh-based InventHelp is working to submit the U TOUCH SECURITY to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) June 05, 2017 -- An inventor from White Plains, N.Y., has considered the importance of protecting one's vehicle from would-be thieves. "I wanted to offer vehicle owners better protection against theft," he said, "so I developed an alternative vehicle-security idea."

U TOUCH SECURITY optimizes security of a vehicle in order to help prevent theft. This avoids loss or damage of the vehicle, which saves money. It also removes hand-grab prints. Overall, it promotes safety and peace of mind.

Compatible with all vehicles (cars, trucks, buses, etc.), reliable and easy to use, U TOUCH SECURITY allows for keyless and convenient operation of a vehicle and serves as an alternative to conventional vehicle-security products.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-MTN-2709, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
