

## **Inventor and InventHelp Client Develops Improved Automotive Glare-Reduction Technology (RCO-237)**

*Based in Pittsburgh, Pa., InventHelp is submitting the "FADE2SHADE" to companies in the hopes of their good faith review.*

PITTSBURGH, PA ([PRWEB](#)) June 07, 2017 -- "I wanted to be able to see clearly out of my vehicle without having to wear sunglasses or squint," said an inventor from Niagara Falls, N.Y. "Traditional sun visors just do not cut it when the glare is really intense, which is why I came up with a better way to reduce brightness."

He developed the "FADE2SHADE" to provide an effective way to reduce bright sunlight and glare. The system prevents the driver from being blinded by intense light. It ensures that the driver has a clear, unobstructed view of the road. The invention makes for safer, more comfortable driving conditions. It also reduces UV damage to the vehicle interior and upholstery. Additionally, the system is adaptable for use with any new or existing vehicle.

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-RCO-237, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
