

Inventor and InventHelp Client Develops Automotive Safety System for Young Children (FLA-2807)

A Pennsylvania-based invention company, InventHelp is submitting the BABY SAFE to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) July 18, 2017 -- "I wanted to prevent the senseless deaths that result from young children being left alone in motor vehicles," said an inventor from Port St. Lucie, Fla. "I devised this system to keep the vulnerable and innocent young from being forgotten by their parents or caregivers."

She developed the BABY SAFE to ensure that parents and caregivers remember to take their child with them when exiting the vehicle. The system prevents children from being left in an unattended vehicle. This is designed to enhance personal safety by avoiding injuries and/or deaths. The invention is adaptable for use in any new or existing vehicle. It offers added peace of mind. Additionally, the unit features automatic operation.

The original design was submitted to the Ft. Lauderdale office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FLA-2807, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
