

## **Inventor and InventHelp Client Develops Optimized Automotive Sun Shade (FRO-478)**

*One of America's leading invention submission companies, InventHelp is submitting the BUILT IN CAR COVER SHADE to companies for their review.*

PITTSBURGH, PA ([PRWEB](http://www.PRWEB.com)) July 19, 2017 -- "I hate when I return to my vehicle and climb inside only to find that the interior is burning hot," said an inventor from San Miguel, Calif. "In order to keep the vehicle cabin cool and comfortable while the vehicle is parked outdoors in the hot sunlight, I came up with this idea."

He developed the BUILT IN CAR COVER SHADE to protect the vehicle interior from hot sunlight. The unit keeps upholstery and interior safe from fading and cracking. The device ensures that seats, buckles and other surfaces do not burn motorists when returning to the vehicle. The accessory also makes the steering wheel cool to the touch upon returning. All of this offers added peace of mind. In addition, the design eliminates the need to use conventional sun blockers and shades.

The original design was submitted to the Fresno office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FRO-478, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
