

InventHelp Invention Protects Sides of Parked Vehicles from Scratches, Dents and Dings (HUN-279)

The V BODY GUARD is being submitted to companies by InventHelp, a leading inventor service company.

PITTSBURGH, PA ([PRWEB](#)) July 20, 2017 -- When other people open the doors of their vehicles that are parked next to yours, the risk of damage in the form of scratches, dents and dings rises. Also, runaway shopping carts can slam into the side of the vehicle. "This is why I decided to develop this invention," said an inventor from Webster, Texas.

The V BODY GUARD optimizes protection for the sides of a vehicle to prevent scratches, dents and dings caused by the open doors of adjacent vehicles or runaway shopping carts. This avoids the need for repairs, which saves money. Overall, it promotes peace of mind.

Portable, easy to use and producible in different sizes, colors and designs, the V BODY GUARD is ideal for all vehicle owners. The inventor has created a prototype of his idea.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HUN-279, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
