

Tool for Clearing Frost, Ice and Snow from Windshields Developed by InventHelp Inventor

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Frost Cutter, to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) September 07, 2017 -- PITTSBURGH...After many mornings of having to wait to warm up his vehicle and scrape frost and ice from the windshield, an inventor from Tualatin, Ore., decided to develop a better and faster way to clear his windows, making his car safer to drive.

The patent-pending FROST CUTTER enables a user to remove frost, ice and/or snow from a vehicle windshield in a more convenient manner. It eliminates the need for strenuous manual removal, which saves time and effort. It also enhances comfort and ensures good visibility. Ergonomic and easy to use, the FROST CUTTER serves as an alternative to conventional winterizing products. The inventor has created a prototype of his idea.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-POO-290, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
