

Efficient Road-Sign Winterizer Invented by InventHelp Client (DVR-1030)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Sight Sign, in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) September 08, 2017 -- PITTSBURGH...Working in road maintenance, an inventor from Thornton, Colo., had trouble in unfamiliar areas due to not being able to see road signs that were covered by snow and ice. This inspired him to design a way to solve this problem.

The SIGHT SIGN maintains proper visibility of a road sign during winter. It eliminates accumulation of snow and ice in order to ensure that drivers can see the sign clearly. This helps avoid confusion and aids lost drivers. Easy to power and use, and producible in design variations, the SIGHT SIGN is designed to promote convenience and peace of mind.

The original design was submitted to the Denver office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DVR-1030, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
