

Sciometric Instruments Honored with Ford Motor Company World Excellence Award

Sciometric Instruments has been awarded with the highest supplier recognition given by the Ford Motor Company. The World Excellence Award recognizes Sciometric as one of Ford's top suppliers in the world for 2004.

([PRWEB](#)) May 10, 2005 -- Tony Brown, Ford Motor Company's Senior Vice President of Global Purchasing said, "We demand a lot from companies who work with us and expect superior performance in every aspect of those relationships. That's why we've created the World Excellence Awards. As the highest honor a supplier can earn, the awards are our opportunity to recognize and acknowledge significant and outstanding contribution to the vision of Ford Motor Company."

Sciometric was awarded a Recognition of Achievement, which is given to suppliers who impact customer satisfaction by leading key Ford initiatives. Sciometric received its award for Consumer Focused Technology for its Engine In-Process Test (IPT) Suite and engine noise, vibration and harshness (NVH) technologies.

Sciometric's engine NVH test technology uses advanced signature analysis to accurately identify engine noise, vibration and harshness (NVH) defects in real time right on the factory floor. Sciometric's Engine In-Process Test (IPT) Suite is designed to maximize the productivity and quality of engine manufacturing by discovering defects early in the engine assembly process.

"We are honored to receive this recognition," said Nathan Sheaff, President and CEO of Sciometric Instruments Inc. "This award is a reflection of our commitment to create innovative defect detection and analysis technologies that empower our customers to improve quality, increase productivity and decrease costs across the entire production lifecycle."

About Sciometric® Instruments

Sciometric is the premier provider of defect detection, analysis and traceability solutions for manufacturers. We are shaping the future of efficient, high quality manufacturing.

Our solutions deliver the insight manufacturers require to improve quality, increase productivity and decrease costs across the entire production lifecycle.

Sciometric customers are leading manufacturing companies in the automotive, industrial, medical, electronics and other sectors. Customers who have implemented Sciometric solutions to help them achieve their quality and productivity objectives include Ford, General Motors, Behr, DaimlerChrysler, BMW, Toyota, Cummins, Delphi, John Deere, Caterpillar, Mazda, Hyundai, Visteon, Holden, International, Saturn, Medtronic and Hewlett Packard.
