

## **InventHelp Client's System Helps Deter School-Bus Bullying (NJD-971)**

*InventHelp, based in Pittsburgh and founded in 1984, is submitting the SYLLABUS to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 01, 2015 -- "As a teacher I've noticed that some students tend to fall into bullying when in unstructured environments," said an inventor from Freehold, New Jersey, "so I decided that there needs to be a way to structure the time on school buses."

The patent-pending SYLLABUS provides an effective deterrent against bullying. It does this by providing a structured environment on a school bus. As a result, it promotes safety and peace of mind. In addition, it enhances students' learning. The system is easy to use and versatile, and educational companies can become involved.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-NJD-971, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
