

InventHelp Inventor Designs Improved Visor Accessory for Vehicles (RIM-167)

Pittsburgh-based InventHelp is attempting to submit this idea, the CROLL VISOR ACCESSORY, to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 02, 2015 -- An inventor, from Fairfax, Va., thought there needed to be an improved way to eliminate annoying sun glare while driving, so she invented the patent-pending CROLL VISOR ACCESSORY.

The CROLL VISOR ACCESSORY helps to prevent annoying sun glare and eyestrain for drivers. In doing so, it eliminates the need to squint when driving and it provides added coverage and protection from the sun. As a result, it enhances travel comfort. The invention features a versatile and portable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, a prototype is available.

The inventor described her inspiration for the invention. "I thought there needed to be a more convenient way to prevent the sun from blinding me while driving, so I created my prototype."

The original design was submitted to the Richmond office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-RIM-167, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
