

Automotive Floor Mat Cleaning Machine Invented by InventHelp Client (ALL-1096)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Footer, to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) September 22, 2017 -- PITTSBURGH...An inventor from Stone Mountain, Ga., has developed the FOOTER, a special machine for washing, cleaning and drying a vehicle's floor mats. This device can be used by automotive dealers, detailers, car washes and other businesses where automotive floor mats need to be cleaned.

"I grew tired of vacuuming and shampooing my vehicle's floor mats and then waiting for them to dry. My invention allows this process to be completed more effectively and efficiently, leaving floor mats fresh and clean," said the inventor. The FOOTER quickly and easily cleans automotive floor mats. It saves time and effort when cleaning floor mats. This machine will ensure top-quality results and lead to increased customer satisfaction.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ALL-1096, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
