

Vehicle Weather Protector Invented by InventHelp Client (OLC-252)

InventHelp, a leading inventor service company, is working to submit Car Bubble to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) September 27, 2017 -- An inventor from Oklahoma City, Okla., has developed the CAR BUBBLE, an energy-absorbing covering for protecting a vehicle parked outside in a hailstorm or other inclement weather.

"I was inspired to invent this based on experience of hail damage to my mother's vehicle," said the inventor. The CAR BUBBLE prevents vehicle from being damaged by falling hail. It provides complete cover for a vehicle parked outside. It also provides protection for the vehicle's side panels. This covering will help uphold vehicular value by keeping it in mint condition.

The original design was submitted to the Oklahoma City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-OLC-252, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
