

InventHelp Invention Solves the Problem of Cold Steering Wheels (JMC-1977)

InventHelp, a leading inventor service company, is working to submit H.S.W.C. to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) September 28, 2017 -- An inventor from Mount Angel, Ore., has been selling cars for over 15 years, and he knows the discomfort of having to drive an automobile with a cold steering wheel, so he's familiar with the hassle of cold steering wheels. "My design solves this problem," he said.

The patent-pending H.S.W.C. is an accessory that provides an easy solution to the problem of a cold steering wheel. It eliminates the need to contact a cold wheel, which prevents discomfort and hassle. Overall, it promotes peace of mind. Ergonomic and easy to use, this accessory serves as an alternative to purchasing an expensive vehicle with a built-in steering-wheel warmer, which saves money.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-JMC-1977, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
