

## **InventHelp Invention Provides an Alternative Way to Remove Snow and Ice from a Vehicle Exterior (DPH-145)**

*InventHelp, a leading inventor service company, is working to submit Auto Heat Shell to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 03, 2017 -- PITTSBURGH...Getting up in the morning to find inches - or more - of snow had fallen overnight is quite disheartening, and the thought of having to outside and deal with it can be unbearable. "I hate going out in the cold weather to clear snow and ice from my car, especially on top of having to shovel walkways," said an inventor from Northglenn, Colo. "This invention solves this problem."

The patent-pending AUTO HEAT SHELL enables a user to remove snow and ice from a vehicle exterior in a quicker, easier and safer way. It eliminates the need to scrape and brush, which saves time and effort. It also prevents marring and damage. Designed to promote convenience and peace of mind, the AUTO HEAT SHELL is lightweight, ergonomic, durable, and easy to use, dry, fold, store and install, and it's ideal for use on both consumer and commercial vehicles.

The original design was submitted to the Denver office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DPH-145, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
