

## **InventHelp Inventor Develops Device to Protect Rims from Brake Dust (FRO-500)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Brake Dust Blocker, in the hopes of a good faith review.*

PITTSBURGH, PA ([PRWEB](#)) October 06, 2017 -- PITTSBURGH...“I thought there needed to be a simple way to keep a vehicle's rims nice and clean,” said an inventor, from Taft, Calif., “so I invented the BRAKE DUST BLOCKER.”

The BRAKE DUST BLOCKER provides an effective way to protect wheel rims from brake dust. In doing so, it helps to prevent brake dust accumulations. As a result, it eliminates the need to continually clean a vehicle's rims. The invention features a durable design that is easy to install and use so it is ideal for vehicle owners. Additionally, it is producible in design variations, and a prototype is available.

The inventor described the invention design. “My design eliminates the need to clean black brake dust from wheel rims.”

The original design was submitted to the Fresno office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FRO-500, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
