

## **InventHelp Inventors Develop Automotive Sunshade (SAH-1130)**

*InventHelp, a leading inventor service company, is working to submit Side Shade to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 09, 2017 -- PITTSBURGH...Inventors from Live Oak, Calif., have developed the SIDE SHADE, a portable sunshade for the driver's side window of a motor vehicle. A prototype is available.

"We were having problems driving due to the bright sunlight shining through the side window. We developed a side shade to provide sunlight protection while driving," said the inventors. Suitable for all side windows, the SIDE SHADE protects against bright sunlight entering through the upper portion of the side window. This enhances personal comfort and travel safety. It also allows drivers to see traffic approaching from the side. In addition, this sunshade is easy to slide into position and remove with one hand, and it spares the driver sunlight-related discomfort, fatigue, overheating and eyestrain.

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SAH-1130, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
