

Inventor Develops Vehicle Safety System for Young Children/Pets (DLL-3165)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Child Alert, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) October 19, 2017 -- PITTSBURGH..."I saw far too many news stories detailing the deaths of children and pets who were left in unattended vehicles," said an inventor from Dallas, Texas. "I came up with this safety system so that motorists would not forget their children or pets in their vehicles."

He developed the CHILD ALERT to remind the driver to remove a child or pet when exiting the vehicle. The system prevents a child or pet from being left in the vehicle unattended. This reduces the risk of injury and/or death caused by hypothermia. It is designed to enhance personal safety. The system thereby provides added peace of mind. Furthermore, the invention is adaptable for use in both new and existing vehicles.

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DLL-3165, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
