

Inventor Designs Alternative Method of Removing Snow and Ice from Vehicles (LGI-2200)

InventHelp, a leading inventor service company, is working to submit Baxter Covers to companies for their review.

PITTSBURGH ([PRWEB](#)) October 19, 2017 -- Tired of brushing snow and scraping ice off his car, an inventor from Coram, N.Y., thought that there needed to be a better way of performing these tasks. Eventually he came up with the idea for BAXTER COVERS and decided to develop that idea.

This invention allows for quick and easy removal of snow and ice from a vehicle's exterior. It eliminates the need for brushing and scraping. It also prevents accumulation of more snow and ice. Overall, it saves time and effort.

Ergonomic, portable and easy to use, the BAXTER COVERS is designed to promote efficiency and peace of mind.

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LGI-2200, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
